

**User Manual:**

This movie is about the Robot “Sir Robaac Newton” and a UFO.

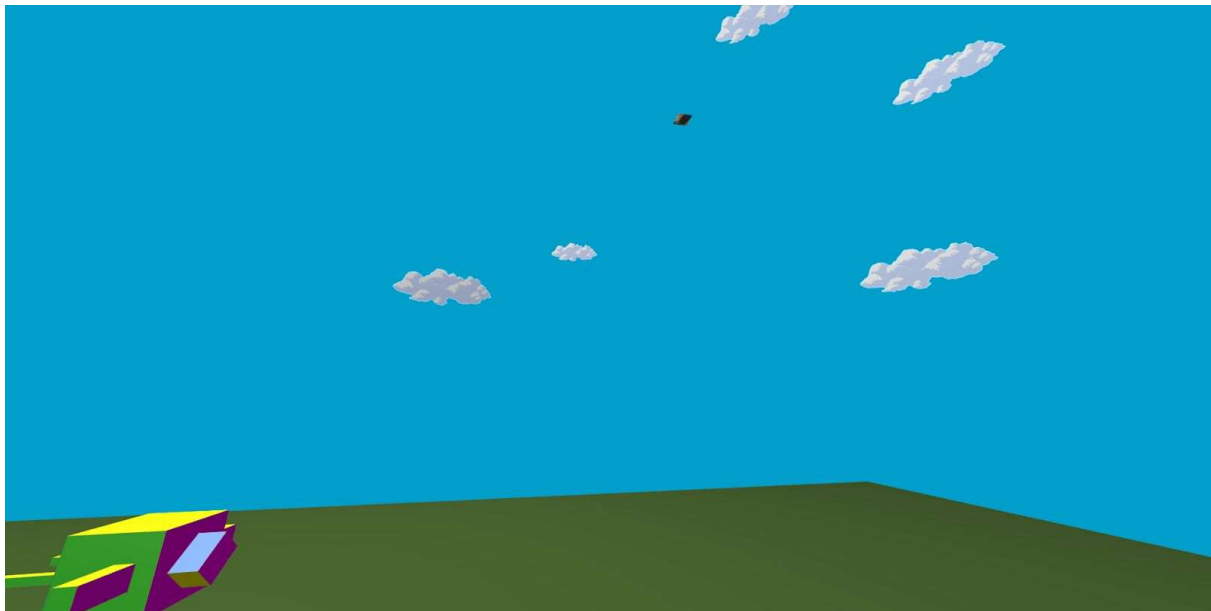

Per default the user is started in the animatedFlight-Mode where he’ll automatically experience the whole movie with 3 scenes.

The animatedFlight can be interrupted by pressing “c”. After that the user can drag his mouse around while holding the left mouse button to change the viewing angle of the camera. With the “Arrow-Up”-key the user moves in the direction where the camera is moving - with the “Arrow-Down”-key he moves in the other direction.

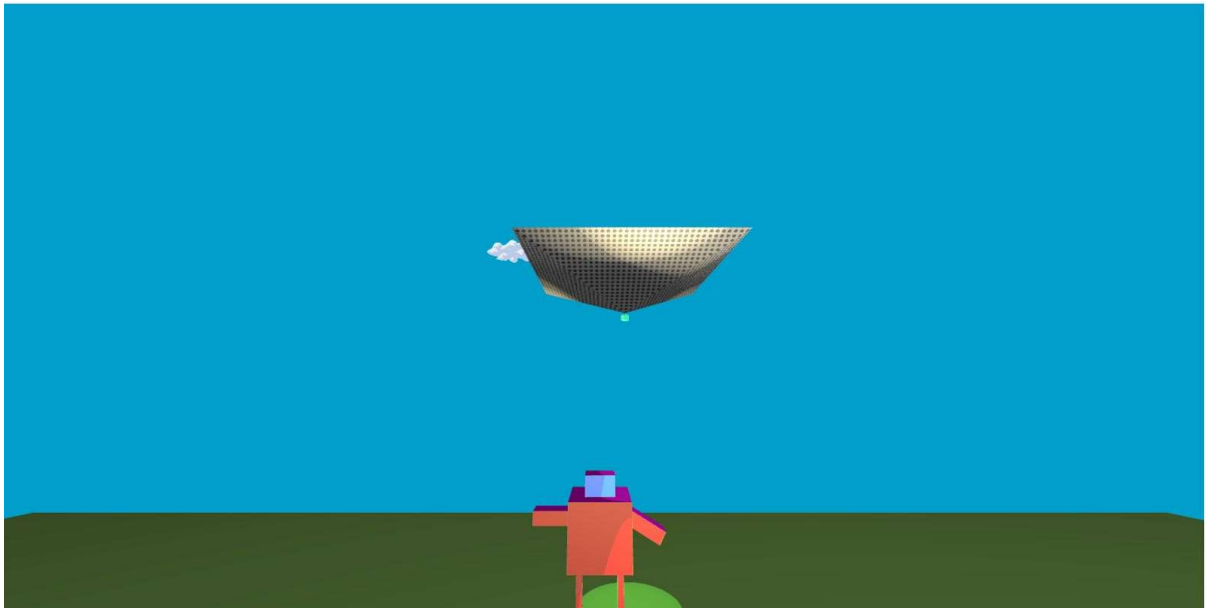

**Scene 1:**

In this scene the camera pans from the right to the left, following the trajectory of a UFO that falls down from the sky. The UFO hits a robot and stops there.

In this scene we can see the billboarded clouds.

**Scene2:**

In this scene the robot first holds the UFO in his hand which then increases in size and floats up above the robot. A rotating crystal is attached under the UFO with a spotlight shining down from the UFO on the robot.

### Scene3:

Finally this scene is from the point of view of Robaac Newton. The camera flies towards the rotating crystal. In this scene we can also see the particles emitted from the glowing rotating crystal. The movie ends open ended right before the crystal.
